I cannot recommend this game in any way, you should only buy this if it's on sale for like 0.99, maybe not even then.

The controls are terrible, you would think you are playing a mobile game, basically just press spacebar and do a trick, thats all there is to it. The graphics don't help either.

I'm an idiot, turns out this is actually just a mobile game and worst part is that it is free on android.

So in short, if you want to pay for a free mobile game that controls and looks terrible, doesn't give you the freedom to move like you want and is glitchy af then go for this. I am currently waiting for my refund.. awesome game if your playing on a nokia 3310 !. absolutely garbage, my little brother bought it and now it is plaguing my library.. Ok, so I have only played through the first few free runs and a few of the head to heads.....so far.

The camera is a bit on the wonky side, sometimes it will turn when you want it to, sometimes it wont. Is it the worst game that you could spend \$7 on, no, absolutely not, there is definitely some enjoy ability to it. There's some hit detection to be fixed, I hope, but theirs hope for this yet. With not many other games for you to play like this out there right now, you don't have many other choices. I made a video for my YT channel of what I have played so far, so if you are interested in the game, watch the video first to see the game for its glory AND flaws!

<https://youtu.be/V4uQvsk2GIKU>. This game is great! hours of fun is there. I really enjoyed the game. It is like an old Free Running. Playing modes are cool, especially challenge with a rival. It was hard, but finally i passed it) Waiting for new characters, modes and locations!. Terrible game, plays like a 0.99 mobile port.
